Computer Science student specializing in Robotics with hands-on experience in Embedded Systems, Java, C++, Unreal Engine 5 and AI applications. Passionate about robotics, GPU programming and computer vision. Looking for a Junior Embedded or Software Engineer position.

Skills:

Programming:

- Java
- Python
- C, C++
- Embedded Systems
- Arduino
- PCB Design

Game Development:

- Unreal Engine 5
- Godot
- GLSL

AI:

- llama.cpp
- PyTorch
- NumPy
- Stable Diffusion

Tools:

- Git
- Linux
- GitHub

Languages:

- Ukrainian - Native
- English - Advanced (B2-C1)
- Polish - Advanced (B2)

Education:

Polish-Japanese Academy of Information Technology (PJATK) - Warszawa, Mazowieckie
Information Technology (Robotics direction)
September 2023 - Present

- Member of the robotics club.

Experience:

- 2023: Worked at a small startup (Cotia) as an Embedded Developer. Helped create the first prototype.
- Summer 2024:Worked with generative AI to help create content for a small firm.

Projects:

Winter 2025:

Image to GCODE converter
https://github.com/oleg996/ImageToGCODE
Tech stack: Java
Converts raster images into optimized G-code toolpaths for CNC plotters by removing unnecessary points and optimizing drawing paths.

A particle simulation with GPU acceleration
https://github.com/oleg996/particle_life
Tech stack: Godot + GLSL
Real-time GPU particle simulation written in GLSL.
Summer 2025:

VR Car Configurator
https://youtu.be/Y1c4jqKK0zQ?si=WuQOI_ny6kO89D-V
Tech stack: Unreal Engine 5
Developed a VR Car Configurator in Unreal Engine 5 with fully interactive controls. Developed all interaction logic and application programming. Environment and 3D assets were created by a collaborating 3D artist.

UE5 interactive interior
https://youtu.be/HoJUcrhyl-k?si=vuMTS2LgxzvevdgV
Tech stack: Unreal Engine 5.
Implemented all UI and interaction systems for a virtual showroom built in Unreal Engine 5.
